

SPIKEDRIVER®

MODEL 89 - 500 S&W Magnum

MODEL 90 – 460 S&W Magnum

MODEL 90A – 454 Casull

Proudly built in the USA, the Big Horn Armory lever-action rifles continue the rich legacy of American firearms design and development. Built from the ground-up and solidly engineered using the latest CNC technology, the Model 89, 90 & 90A embody the best of the Model 1886 and Model 1892 lever-actions in a modern platform capable of handling the powerful .500 S&W Magnum, and other big-bore cartridges, while delivering 300-600 fps more than the revolver. Imagine 458 Win Mag power from a pistol cartridge, such power exists in our guns. Both rifle and carbine models are manufactured with 17-4 stainless steel precision machined and surface hardened to Rc82 using our Nitride process to deliver consistent downrange performance and rugged in-the-field dependability. The Nitride Hunter Black finish is the base color of our stainless steel after processing. The black finish is removed from the exterior to create our Matte stainless steel finish. The selected American black walnut stock and forend are fitted with integral front and stud rear sling swivel mounts. The pistol-grip buttstock has a one-inch recoil-taming pad. Stock and forend are given numerous coats of a durable synthetic satin finish. The standard rifle and carbine are equipped with aperture rear and post front sights. Our large, hunter-friendly curved-lever enables ease of operation, especially with gloved hands. Honoring the long tradition of great American sporting rifles, the new Model 89, 90 & 90A provide hunters with pride in ownership, and a powerful advantage afield.
