

Employee Spotlight: Justin Dorale

This month we would like to introduce you to Justin Dorale. Justin has been with the company for over two years as a Machinist, Programmer, Designer, and Shop Hand.

“Working at BHA allows me to work in a field that I enjoy. Not many places in the country allow you to build and work with firearms every day,” Justin commented.

Before working at BHA, Justin joined the Marine Corp after High School. While in the military, Justin went to college and graduated with a degree in

Machine Tool Technology. After he left the military, he started his career in the firearms industry with Gunwerks where he programmed, designed, and machined for them for four years before joining BHA.

Justin’s dad taught him how to shoot at a young age. He always had a rifle with him on the ranch for one reason or another. One Christmas morning, he woke up to a Crossman BB gun sitting under the tree – his first firearm. After that, he got into 22 rifles and moved upward from there. Justin also likes to tinker on his own firearms.

His favorite BHA firearm is the [Model 90A](#) with the Collector’s Grade Walnut in Matte Stainless. This model matches his Freedom Arms Model 83 in 454 Casull.

When he is not at work, Justin can be found playing video games or working in his shop on his own firearm projects and designs in the colder months. Once the temperature starts to warm up, Justin disappears into the mountains or on the road riding his motorcycle. He also fills his time with ample shooting and reloading.
